1	<p><b>UP 15-29 SU</b></p>  <p>Note! Product picture may differ from actual product</p> <p>Product No.: On request</p> <p>Grundfos UP B circulator pumps have a bronze pump housing for drinking water applications, while Grundfos UP N pumps have a stainless-steel pump housing. Both variants are recommended for underfloor heating systems as the pumped liquid may often become aerated, causing corrosion in cast iron pump housings.</p> <p>The pump is of the canned-rotor type, which means that the pump and motor form an integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid. The pump is characterised by:</p> <ul style="list-style-type: none"><li>• ceramic shaft and radial bearings</li><li>• carbon axial bearing</li><li>• stainless steel rotor can and bearing plate.</li></ul>
